FLAGSHIP SERVICES GROUP
SECTION 111 REPORTING SPECIALISTS

While most Responsible Reporting Entities (RREs) have an awareness of Section 111 quarterly reporting, significant knowledge gaps exist. Without a full understanding of the Reporting process, it is difficult to ensure compliance and there can be substantial financial penalties for non-compliance. We can help assess your current level of Medicare Compliance and build a specific plan to mitigate any risk which may exist due to non-compliance issues. These plans would take into consideration your existing resources, risk tolerance capacity and budget.

Flagship Services Group utilizes a proprietary reporting system called LumenX® that can help automate the burdensome task of having to report manually. Thus ensuring 100% Medicare compliance, risk mitigation, and protection of financial resources.

LumenX Section 111 Web Reporting
- Eliminates technical complexity from reporting process
- Provides secure data transmission
- Enables pre-validation of all submissions to ensure completeness

LumenX Reporting System Benefits
- **On-time Reporting to Medicare** – Reporting during assigned time frame means penalty avoidance
- **User-Friendly** – Easy to use, web-based interface
- **Turnkey Solution** – Handles required systems testing and manages all monthly queries and quarterly claim file submissions

LumenX – More Than Just Reporting
- LumenX maintains claim records in a secure database for on demand monitoring and analysis of open claims
- Reports are generated on request so claim and risk managers can be updated as needed

Integration & Automation
- Eliminate extra work for adjusters
- Makes sure claims are not falling through the cracks
- Avoid over/under reporting claims
- Enables proactiveness with CMS in responses
